FATHIMA FIDA M

UI/UX Designer

+91 8113934901 |fathimafidam1@gmail.com | LinkedIn | Behance

PROFESSIONAL SUMMARY

UI/UX Designer with **about 4 years of experience** designing **web applications, mobile applications, websites, enterprise platforms and data-driven dashboards**. Specialized in transforming complex product requirements into **intuitive, scalable and user - centred digital experiences** through UX design processes.

Experienced in designing **Agentic AI–integrated solutions and enterprise digital products**, while using **AI-powered design tools** to speed up design ideation, research, content creation and design iterations, enabling faster concept validation and more efficient design workflows.

Skilled in **UX research**, **user journey mapping, information architecture, wireframing, high-fidelity UI design, usability testing and design systems**, ensuring consistent and scalable product experiences across platforms.

Passionate about **simplifying complex workflows, improving usability and delivering high-impact digital experiences** that align user needs with business and product goals.

AT A GLANCE

Quick wins from my experience:

4 Years Experience	AI integrated Product design	Complex workflow & Data heavy dashboard Design	AI-Assisted Design
UI UX Designing	Agentic AI Platforms	Data-Driven Enterprise Tools	Rapid Ideation & Prototyping

CORE SKILLS & TOOLS

Core UX & Product Design Skills

- UX Research & Market and Competitor Analysis
- Persona Creation & Journey Mapping
- Information Architecture & User Flows
- Wireframing & Interface Designing
- Rapid Prototyping & Interaction Design
- Usability Testing & Feedback Analysis
- Design Systems & Scalable UI
- Responsive & Accessible Design

AI & Productivity Tools

- **Figma Make**, **Claude** and **Canva AI** for Rapid Prototyping and Designing
- **ChatGPT & Perplexity** for UX copy & research
- AI-assisted user persona generation
- Prompt-based rapid wireframing and ideation
- Generative tools for design iteration

Collaboration & Workflow

- Agile Methodology
- Cross-Functional Collaboration
- Developer Handoff
- Iterative Design Process and Feedback Incorporation

Tools & Workflow

Figma • Adobe XD • Miro • Canva • Hotjar • WordPress • Jira • ServiceNow • Microsoft PowerPoint

PROFESSIONAL EXPERIENCE

UI/UX Designer | UST - Trivandrum

Jan 2025 - Present

Core Responsibilities:

- **Design enterprise web applications and data-driven dashboards** from concept to **high-fidelity UI**, translating complex requirements into intuitive user experiences.
- **Leverage AI-assisted design tools** to accelerate **ideation, rapid prototyping, and design iteration cycles**, improving overall design efficiency.
- **Maintain scalable design systems** aligned with **organizational brand guidelines** to ensure consistent and reusable UI components.
- **Collaborate with developers, product managers, and stakeholders** to ensure **seamless implementation and effective developer handoff**.
- **Improve usability, navigation clarity, and data visualization** to enhance user experience across enterprise platforms.

Key Projects

- **Agentic AI integrated alert and ticket management tool:**
  Designed an AI-powered enterprise monitoring and ticket management platform with a unified single-pane interface that streamlines alert management and improves operational visibility.
- **SSL/TLS Certificate Management Platform:**
  Designed an SSL/TLS certificate management platform with dashboards for certificate discovery and expiry checking to help prevent service disruptions.
- **Centralized Service Catalogue Portal:**
  Designed a centralized service catalogue portal that consolidated distributed service information into a unified platform.
- **Automation Request Tracking Platform:**
  Designed an automation request tracking platform with dashboards and workflows to collect, manage and track automation requests across teams.
- Created **presentation templates and visual assets in Microsoft PowerPoint** for client presentations and documentation.

User Experience Designer | Aarrrmor Digital Agency

Sep 2022 - Jun 2023

Key Design Contributions

- Led **website redesign and visual identity improvements** that strengthened brand recognition and improved conversion rates by aligning design with product and business goals.
- Designed **responsive websites using Figma and WordPress**, applying UX best practices, usability testing and data-driven insights to improve user engagement and conversions.
- Designed **web applications and dashboards** that streamlined workflows and supported faster product decision-making.
- Created **landing pages and hero sections for marketing campaigns** to improve user engagement and generate quality leads.
- Built and maintained **design systems** to ensure consistent, scalable and reusable UI components across products.

Selected Website Projects

- Aarrrmor **- Digital Marketing Agency Website Redesign:**
  Website redesign focused on improving user experience, navigation clarity and visual identity.
- The India Energy Hour **- Energy insights podcast platform:**
  Designed website experience for a podcast platform sharing insights from leading scientists and experts on India's energy sector.

- **101Reporters - Hyperlocal news platform:**
  UX Research, UI Design, Website Revamp and Website Development for a journalism platform publishing grassroots stories.
- **Decoria - Premium plywood and laminates discovery platform:**
  Design and Development (WordPress) for a platform helping users discover premium plywood and laminate products.

EDUCATION & CERTIFICATIONS

B.Tech. Civil Engineering | APJ Abdul Kalam Technological University *2016 - 2020*

Certifications

- Design Thinking for UX Design Managers — LinkedIn Learning
- UX Concepts Validation: Usability Testing, Information Architecture, Card Sorting — Into UX Design
- UX Research and Strategy — Into UX Design
- AWS Certified Cloud Practitioner — Amazon Web Services
